

DUST RESISTANT AND HIGH SPEED XP & HS SERIES

30.000.000 CYCLES

The XP parallel grippers are specially suitable for food grade application in dusty environment thanks to the stainless steel fingers, the Delrin® cap and the FDA grease. The HS (High Speed)

grippers are specially suitable for application where a very fast cycletime is required on the mechanical cam gear driven high speed machines.

SEALED 2 AND 3 JAWS GRIPPERS SX - SXT SERIES

IP67

A parallel gripper, specifically designed to provide the better performances in harsh environments, internally sealed to preserve from dust, oil and also one meter underwater with protection class IP67.

These grippers simply have no internal volumes. So there is no risk of aspiration caused by the pump effect of a variable volume.
